**** SECTION 4 - FIRST AID MEASURES ****

Eyes: Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower lids. Protect unaffected eye. Immediate further treatment in ophthalmic hospital. Continue rinsing eye until arrival at ophthalmic hospital.

Skin: Flush skin with plenty of soap and water. Wash contaminated clothing before reuse. Get medical attention.

Ingestion: Never give fluids if patient is unconscious or having convulsions. Have patient drink plenty of water in small sips if conscious. Call a physician immediately.

Indication of any immediate medical attention and special treatment needed: If required, therapy of irritative effect. Early endoscopy in order to assess mucosa lesions in the oesophagus and stomach which may appear. Aspirate leftover substance if necessary. It is possible to detect Methanol in blood.

Antidote treatment: Ethanol. Treatment of allergic reaction if necessary

**** SECTION 5 - FIRE FIGHTING MEASURES ****

General Information: Self-contained breathing apparatus and protective clothing should be worn in fighting large fires involving chemicals. Determine the need to evacuate or isolate the area according to your local emergency plan.

Suitable extinguishing media: Use Alcohol-resistant foam, dry chemical, or carbon dioxide.

Further information: Do not direct a solid stream of water or foam into hot, burning pools: this may cause frothing and increase fire intensity. Cool closed containers exposed to fire with water spray.

Unusual Fire and Explosion Hazards: Irritating fumes and organic acid vapors may develop when material is exposed to elevated temperatures or open flame.

Flash Point: 138°C (280°F)

Auto-ignition temperature: 300°C (572°F)

Explosion Limits, Lower: N/A. Upper: N/A.

HMIS Classification Health 2 Health 2
Flammability 1 Fire 1
Physical hazard 1 Reactivity 1

Advice for firefighters: Water used to extinguish fire should not enter drainage systems, soil or stretches of water. Ensure there are sufficient retaining facilities for water used to extinguish fire. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

**** SECTION 6 - ACCIDENTAL RELEASE MEASURES ****

General Information: Use proper personal protective equipment as indicated in Section 8. Keep out unprotected persons, ensure adequate ventilation.

Spills/Leaks: Absorb spill with inert material, (e.g., dry sand or earth), then place into a chemical waste container, to be disposed of in compliance with existing regulations.

Environmental precautions: Do not flush into surface water, sanitary sewer system.

**** SECTION 7 - HANDLING AND STORAGE ****

Handling: Provide good ventilation or extraction. Normal measures for preventive fire protection. Do not breathe vapor. Avoid skin and eye contact. Do not ingest. Do not empty into drains.

Storage: Keep containers tightly closed in a cool, dry, well-ventilated place. Protect from moisture.

**** SECTION 8 - EXPOSURE CONTROLS, PERSONAL PROTECTION ****

Engineering Controls: Use adequate general or local exhaust ventilation to keep airborne concentrations below the permissible exposure limits.
Personal Protective Equipment (PPE)
Eyes: Wear safety glasses and chemical goggles if splashing is possible.
Skin: Wear appropriate protective gloves and clothing to prevent skin exposure.
Clothing: Wear appropriate protective clothing to minimize contact with skin.
Respirators: Wear a NIOSH/MSHA or European Standard EN 149 approved full-facepiece airline respirator in the positive pressure mode with emergency escape provisions.

Hygiene measures: When using, do not eat, drink or smoke. Wash face and/or hands before break and end of work. Remove contaminated or saturated clothing. Wash contaminated clothing before re-use.

Protective measures: Handle in accordance with good industrial hygiene and safety practices. If workplace exposure limits are exceeded and/or larger amounts are released (leakage, spilling, dust) the indicated respiratory protection should be used. If there is the possibility of skin/eye contact, the indicated hand/eye/body protection should be used. Do not breathe in vapors or aerosols. Avoid contact with skin and eyes.
