**** SECTION 4 - FIRST AID MEASURES ****

General information Take persons to a safe place. Observe self-protection for first aid. Before seeking medical attention remove contaminated clothing and shoes. Take a copy of the Safety Data Sheet when going for medical treatment.

Eyes: Immediately hold eyelids apart and flush with plenty of water for at least 15 min. Continue to bathe eyes during transport to medical practitioner.

Skin: Immediately flush skin with plenty of water. Wash contaminated clothing before reuse. Get medical attention.

Inhalation: Remove from exposure to fresh air immediately.

Ingestion: If conscious, drink plenty of water. Do not induce vomiting. Consult a physician immediately.

Indication of any immediate medical attention and special treatment needed:

Product may hydrolyse upon contact with body fluids in the gastrointestinal tract to produce additional methanol; if required, therapy of irritative effect. Early endoscopy in order to assess mucosa lesions in the oesophagus and stomach which may appear. If necessary, aspirate leftover substance.

Detection of substance(Methanol) possible in blood. Antidote treatment: Ethanol

**** SECTION 5 - FIRE FIGHTING MEASURES ****

General Information: Self-contained breathing apparatus and protective clothing should be worn in fighting large fires involving chemicals. Determine the need to evacuate or isolate the area according to your local emergency plan.

Suitable extinguishing Media: Use Alcohol-resistant foam, dry chemical, or carbon dioxide.

Further information: Do not direct a solid stream of water or foam into hot, burning pools: this may cause frothing and increase fire intensity. Cool closed containers exposed to fire with water spray.

Unusual Fire and Explosion Hazards: Irritating fumes and organic acid vapors may develop when material is exposed to elevated temperatures or open flame.

Flash Point: 82 °C (180°F)

Auto-ignition Temperature: 295°C (563°F)

Advice for firefighters: Water used to extinguish fire should not enter drainage systems, soil or stretches of water. Ensure there are sufficient retaining facilities for water used to extinguish fire. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulation

**** SECTION 6 - ACCIDENTAL RELEASE MEASURES ****

General Information: Use proper personal protective equipment as indicated in Section 8. Keep out unprotected persons, ensure adequate ventilation.

Spills/Leaks: Absorb spill with inert material, (e.g., dry sand or earth), then place into a chemical waste container, to be disposed of in compliance with existing regulations.

Environmental precautions: Do not flush into surface water, sanitary sewer system

**** SECTION 7 - HANDLING AND STORAGE ****

Handling: Provide good ventilation or extraction. Do not taste or swallow. Avoid contact with eyes, skin, and clothing. Wash hands after handling. Avoid inhalation of vapors and spray mists.

Storage: Keep containers tightly closed in a cool, well-ventilated place. Keep away from sources of ignition. Take precautionary measures against static discharges. All equipment used when handling the product must be grounded. Protect from moisture

**** SECTION 8 - EXPOSURE CONTROLS, PERSONAL PROTECTION ****

Engineering Controls: Use adequate general or local exhaust ventilation to keep airborne concentrations below the permissible exposure limits.
